**Resolution on the Presidential Campaign**

**Whereas** George W. Bush's presidency has been devastating to the interests of labor, education, the environment, and, generally, to the well-being of our nation, other nations, and the peoples of the world, and his 're-election' would mean a continuation of the same brutal, anti-labor regime;

**Resolved**, that the PSC create a mechanism to enable members who want to participate in the Kerry campaign to do so.
