The data are filtered on Term: **Fall 2026**. Student Population: **Total**

NOTE: Users may note differences in the count of registered (enrolled) students in this Application to Enrollment Funnel report compared with the new student counts in the Enrollment Snapshot report. Such differences are due, in part, to the way new student categories are defined in the two reports. New student categories for the Application to Enrollment Funnel report are based on the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. For *enrolled* students as reported in this Enrollment Snapshot report, new student categories are based first on data in the PROG REASON field of the PS\_ACAD\_PROG table, and if not available, then looks to the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. If the codes are discrepant in the two CUNYfirst tables, there will be inconsistencies in the counts by new student categories in the two reports. In addition, the Application to Enrollment Funnel report presents counts only for students who have an application for the selected term. For the Enrollment Snapshot report, students may enroll as new students (freshmen or transfers) in the selected term, even if they had applied for admission (but never enrolled) in an earlier term. So this also may account for differences in the count of students.

The data are filtered on Term: **Fall 2026**. Student Population: **Undergraduate Students**

NOTE: Users may note differences in the count of registered (enrolled) students in this Application to Enrollment Funnel report compared with the new student counts in the Enrollment Snapshot report. Such differences are due, in part, to the way new student categories are defined in the two reports. New student categories for the Application to Enrollment Funnel report are based on the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. For enrolled students as reported in this Enrollment Snapshot report, new student categories are based first on data in the PROG REASON field of the PS\_ACAD\_PROG table, and if not available, then looks to the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. If the codes are discrepant in the two CUNYfirst tables, there will be inconsistencies in the counts by new student categories in the two reports. In addition, the Application to Enrollment Funnel report presents counts only for students who have an application for the selected term. For the Enrollment Snapshot report, students may enroll as new students (freshmen or transfers) in the selected term, even if they had applied for admission (but never enrolled) in an earlier term. So this also may account for differences in the count of students.

The data are filtered on Term: **Fall 2026**. Student Population: **Graduate Students**

NOTE: Users may note differences in the count of registered (enrolled) students in this Application to Enrollment Funnel report compared with the new student counts in the Enrollment Snapshot report. Such differences are due, in part, to the way new student categories are defined in the two reports. New student categories for the Application to Enrollment Funnel report are based on the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. For enrolled students as reported in this Enrollment Snapshot report, new student categories are based first on data in the PROG REASON field of the PS\_ACAD\_PROG table, and if not available, then looks to the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. If the codes are discrepant in the two CUNYfirst tables, there will be inconsistencies in the counts by new student categories in the two reports. In addition, the Application to Enrollment Funnel report presents counts only for students who have an application for the selected term. For the Enrollment Snapshot report, students may enroll as new students (freshmen or transfers) in the selected term, even if they had applied for admission (but never enrolled) in an earlier term. So this also may account for differences in the count of students.

The data are filtered on Term: **Fall 2026**. Student Population: **First-time Freshmen**

NOTE: Users may note differences in the count of registered (enrolled) students in this Application to Enrollment Funnel report compared with the new student counts in the Enrollment Snapshot report. Such differences are due, in part, to the way new student categories are defined in the two reports. New student categories for the Application to Enrollment Funnel report are based on the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. For enrolled students as reported in this Enrollment Snapshot report, new student categories are based first on data in the PROG REASON field of the PS\_ACAD\_PROG table, and if not available, then looks to the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. If the codes are discrepant in the two CUNYfirst tables, there will be inconsistencies in the counts by new student categories in the two reports. In addition, the Application to Enrollment Funnel report presents counts only for students who have an application for the selected term. For the Enrollment Snapshot report, students may enroll as new students (freshmen or transfers) in the selected term, even if they had applied for admission (but never enrolled) in an earlier term. So this also may account for differences in the count of students.

The data are filtered on Term: **Fall 2026**. Student Population: **Transfer Entrants**

NOTE: Users may note differences in the count of registered (enrolled) students in this Application to Enrollment Funnel report compared with the new student counts in the Enrollment Snapshot report. Such differences are due, in part, to the way new student categories are defined in the two reports. New student categories for the Application to Enrollment Funnel report are based on the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table, and if not available, then looks to the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. If the codes are Enrollment Snapshot report, new student categories are based first on data in the PROG REASON field of the PS\_ACAD\_PROG table, and if not available, then looks to the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. If the codes are discrepant in the two CUNYfirst tables, there will be inconsistencies in the counts by new student categories in the two reports. In addition, the Application to Enrollment Funnel report presents counts only for students who have an application for the selected term. For the Enrollment Snapshot report, students may enroll as new students (freshmen or transfers) in the selected term, even if they had applied for admission (but never enrolled) in an earlier term. So this also may account for differences in the count of students.

The data are filtered on Term: **Fall 2026**. Student Population: **New Graduate Students**

NOTE: Users may note differences in the count of registered (enrolled) students in this Application to Enrollment Funnel report compared with the new student counts in the Enrollment Snapshot report. Such differences are due, in part, to the way new student categories are defined in the two reports. New student categories for the Application to Enrollment Funnel report are based on the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. For *enrolled* students as reported in this Enrollment Snapshot report, new student categories are based first on data in the PROG REASON field of the PS\_ACAD\_PROG table, and if not available, then looks to the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. If the codes are discrepant in the two CUNYfirst tables, there will be inconsistencies in the counts by new student categories in the two reports. In addition, the Application to Enrollment Funnel report presents counts only for students who have an application for the selected term. For the Enrollment Snapshot report, students may enroll as new students (freshmen or transfers) in the selected term, even if they had applied for admission (but never enrolled) in an earlier term. So this also may account for differences in the count of students.

The data are filtered on Term: **Fall 2026**. Student Population: **Undergraduate Degree Students**

NOTE: Users may note differences in the count of registered (enrolled) students in this **Application to Enrollment Funnel** report compared with the new student counts in the **Enrollment Snapshot** report. Such differences are due, in part, to the way new student categories are defined in the two reports. New student categories for the **Application to Enrollment Funnel** report are based on the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. For *enrolled* students as reported in this **Enrollment Snapshot** report, new student categories are based first on data in the PROG REASON field of the PS\_ACAD\_PROG table, and if not available, then looks to the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. If the codes are discrepant in the two CUNYfirst tables, there will be inconsistencies in the counts by new student categories in the two reports. In addition, the **Application to Enrollment Funnel** report presents counts only for students who have an application for the selected term. For the **Enrollment Snapshot** report, students may enroll as new students (freshmen or transfers) in the selected term, even if they had applied for admission (but never enrolled) in an earlier term. So this also may account for differences in the count of students.

The data are filtered on Term: **Fall 2026**. Student Population: **Undergraduate Non-Degree Students**

NOTE: Users may note differences in the count of registered (enrolled) students in this Application to Enrollment Funnel report compared with the new student counts in the Enrollment Snapshot report. Such differences are due, in part, to the way new student categories are defined in the two reports. New student categories for the Application to Enrollment Funnel report are based on the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. For enrolled students as reported in this Enrollment Snapshot report, new student categories are based first on data in the PROG REASON field of the PS\_ACAD\_PROG table, and if not available, then looks to the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. If the codes are discrepant in the two CUNYfirst tables, there will be inconsistencies in the counts by new student categories in the two reports. In addition, the Application to Enrollment Funnel report presents counts only for students who have an application for the selected term. For the Enrollment Snapshot report, students may enroll as new students (freshmen or transfers) in the selected term, even if they had applied for admission (but never enrolled) in an earlier term. So this also may account for differences in the count of students.

The data are filtered on Term: **Fall 2026**. Student Population: **SEEK/CD Students**

NOTE: Users may note differences in the count of registered (enrolled) students in this Application to Enrollment Funnel report compared with the new student counts in the Enrollment Snapshot report. Such differences are due, in part, to the way new student categories are defined in the two reports. New student categories for the Application to Enrollment Funnel report are based on the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. For enrolled students as reported in this Enrollment Snapshot report, new student categories are based first on data in the PROG REASON field of the PS\_ACAD\_PROG table, and if not available, then looks to the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. If the codes are discrepant in the two CUNYfirst tables, there will be inconsistencies in the counts by new student categories in the two reports. In addition, the Application to Enrollment Funnel report presents counts only for students who have an application for the selected term. For the Enrollment Snapshot report, students may enroll as new students (freshmen or transfers) in the selected term, even if they had applied for admission (but never enrolled) in an earlier term. So this also may account for differences in the count of students.

NOTE: Users may note differences in the count of registered (enrolled) students in this Application to Enrollment Funnel report compared with the new student counts in the Enrollment Snapshot report. Such differences are due, in part, to the way new student categories are defined in the two reports. New student categories for the Application to Enrollment Funnel report are based on the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. For enrolled students as reported in this Enrollment Snapshot report, new student categories are based first on data in the PROG REASON field of the PS\_ACAD\_PROG table, and if not available, then looks to the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. If the codes are discrepant in the two CUNYfirst tables, there will be inconsistencies in the counts by new student categories in the two reports. In addition, the Application to Enrollment Funnel report presents counts only for students who have an application for the selected term. For the Enrollment Snapshot report, students may enroll as new students (freshmen or transfers) in the selected term, even if they had applied for admission (but never enrolled) in an earlier term. So this also may account for differences in the count of students.

The data are filtered on Term: **Fall 2026**. Student Population: **High School Students**

NOTE: Users may note differences in the count of registered (enrolled) students in this Application to Enrollment Funnel report compared with the new student counts in the Enrollment Snapshot report. Such differences are due, in part, to the way new student categories are defined in the two reports. New student categories for the Application to Enrollment Funnel report are based on the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPPL\_DATA table. For enrolled students as reported in this Enrollment Snapshot report, new student categories are based first on data in the PROG REASON field of the PS\_ACAD\_PROG table, and if not available, then looks to the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPPL\_DATA table. If the codes are discrepant in the two CUNYfirst tables, there will be inconsistencies in the counts by new student categories in the two reports. In addition, the Application to Enrollment Funnel report presents counts only for students who have an application for the selected term. For the Enrollment Snapshot report, students may enroll as new students (freshmen or transfers) in the selected term, even if they had applied for admission (but never enrolled) in an earlier term. So this also may account for differences in the count of students.

The data are filtered on Term: **Fall 2026**. Student Population: **College Now Only**

NOTE: Users may note differences in the count of registered (enrolled) students in this Application to Enrollment Funnel report compared with the new student counts in the Enrollment Snapshot report. Such differences are due, in part, to the way new student categories are defined in the two reports. New student categories for the Application to Enrollment Funnel report are based on the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. For enrolled students as reported in this Enrollment Snapshot report, new student categories are based first on data in the PROG REASON field of the PS\_ACAD\_PROG table, and if not available, then looks to the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. If the codes are discrepant in the two CUNYfirst tables, there will be inconsistencies in the counts by new student categories in the two reports. In addition, the Application to Enrollment Funnel report presents counts only for students who have an application for the selected term. For the Enrollment Snapshot report, students may enroll as new students (freshmen or transfers) in the selected term, even if they had applied for admission (but never enrolled) in an earlier term. So this also may account for differences in the count of students.

The data are filtered on Term: **Fall 2026**. Student Population: **Exclude High School Students**

NOTE: Users may note differences in the count of registered (enrolled) students in this Application to Enrollment Funnel report compared with the new student counts in the Enrollment Snapshot report. Such differences are due, in part, to the way new student categories are defined in the two reports. New student categories for the Application to Enrollment Funnel report are based on the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. For enrolled students as reported in this Enrollment Snapshot report, new student categories are based first on data in the PROG REASON field of the PS\_ACAD\_PROG table, and if not available, then looks to the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. If the codes are discrepant in the two CUNYfirst tables, there will be inconsistencies in the counts by new student categories in the two reports. In addition, the Application to Enrollment Funnel report presents counts only for students who have an application for the selected term. For the Enrollment Snapshot report, students may enroll as new students (freshmen or transfers) in the selected term, even if they had applied for admission (but never enrolled) in an earlier term. So this also may account for differences in the count of students.

The data are filtered on Term: **Fall 2026**. Student Population: **Undergraduate Readmits**

NOTE: Users may note differences in the count of registered (enrolled) students in this Application to Enrollment Funnel report compared with the new student counts in the Enrollment Snapshot report. Such differences are due, in part, to the way new student categories are defined in the two reports. New student categories for the Application to Enrollment Funnel report are based on the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. For enrolled students as reported in this Enrollment Snapshot report, new student categories are based first on data in the PROG REASON field of the PS\_ACAD\_PROG table, and if not available, then looks to the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. If the codes are discrepant in the two CUNYfirst tables, there will be inconsistencies in the counts by new student categories in the two reports. In addition, the Application to Enrollment Funnel report presents counts only for students who have an application for the selected term. For the Enrollment Snapshot report, students may enroll as new students (freshmen or transfers) in the selected term, even if they had applied for admission (but never enrolled) in an earlier term. So this also may account for differences in the count of students.

The data are filtered on Term: **Fall 2026**. Student Population: **Graduate Readmits**

NOTE: Users may note differences in the count of registered (enrolled) students in this Application to Enrollment Funnel report compared with the new student counts in the Enrollment Snapshot report. Such differences are due, in part, to the way new student categories are defined in the two reports. New student categories for the Application to Enrollment Funnel report are based on the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. For *enrolled* students as reported in this Enrollment Snapshot report, new student categories are based first on data in the PROG REASON field of the PS\_ACAD\_PROG table, and if not available, then looks to the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. If the codes are discrepant in the two CUNYfirst tables, there will be inconsistencies in the counts by new student categories in the two reports. In addition, the Application to Enrollment Funnel report presents counts only for students who have an application for the selected term. For the Enrollment Snapshot report, students may enroll as new students (freshmen or transfers) in the selected term, even if they had applied for admission (but never enrolled) in an earlier term. So this also may account for differences in the count of students.

The data are filtered on Term: **Fall 2026**. Student Population: **Undergraduate Continuing Degree Students**

NOTE: Users may note differences in the count of registered (enrolled) students in this Application to Enrollment Funnel report compared with the new student counts in the Enrollment Snapshot report. Such differences are due, in part, to the way new student categories are defined in the two reports. New student categories for the Application to Enrollment Funnel report are based on the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. For enrolled students as reported in this Enrollment Snapshot report, new student categories are based first on data in the PROG REASON field of the PS\_ACAD\_PROG table, and if not available, then looks to the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. If the codes are discrepant in the two CUNYfirst tables, there will be inconsistencies in the counts by new student categories in the two reports. In addition, the Application to Enrollment Funnel report presents counts only for students who have an application for the selected term. For the Enrollment Snapshot report, students may enroll as new students (freshmen or transfers) in the selected term, even if they had applied for admission (but never enrolled) in an earlier term. So this also may account for differences in the count of students.

| University Total      | 14,249                | 13,755              | 17,687            | 82.4%                                                  | 80.6%                                                    | 11.7%                       | 14.2%                                                          |

The data are filtered on Term: **Fall 2026**. Student Population: **Graduate Continuing Degree Students**

NOTE: Users may note differences in the count of registered (enrolled) students in this Application to Enrollment Funnel report compared with the new student counts in the Enrollment Snapshot report. Such differences are due, in part, to the way new student categories are defined in the two reports. New student categories for the Application to Enrollment Funnel report are based on the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. For enrolled students as reported in this Enrollment Snapshot report, new student categories are based first on data in the PROG REASON field of the PS\_ACAD\_PROG table, and if not available, then looks to the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. If the codes are discrepant in the two CUNYfirst tables, there will be inconsistencies in the counts by new student categories in the two reports. In addition, the Application to Enrollment Funnel report presents counts only for students who have an application for the selected term. For the Enrollment Snapshot report, students may enroll as new students (freshmen or transfers) in the selected term, even if they had applied for admission (but never enrolled) in an earlier term. So this also may account for differences in the count of students.

The data are filtered on Term: **Fall 2026**. Student Population: **Macaulay Honors College**

NOTE: Users may note differences in the count of registered (enrolled) students in this Application to Enrollment Funnel report compared with the new student counts in the Enrollment Snapshot report. Such differences are due, in part, to the way new student categories are defined in the two reports. New student categories for the Application to Enrollment Funnel report are based on the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. For *enrolled* students as reported in this Enrollment Snapshot report, new student categories are based first on data in the PROG REASON field of the PS\_ACAD\_PROG table, and if not available, then looks to the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. If the codes are discrepant in the two CUNYfirst tables, there will be inconsistencies in the counts by new student categories in the two reports. In addition, the Application to Enrollment Funnel report presents counts only for students who have an application for the selected term. For the Enrollment Snapshot report, students may enroll as new students (freshmen or transfers) in the selected term, even if they had applied for admission (but never enrolled) in an earlier term. So this also may account for differences in the count of students.
